May 11-13 2027

Iran Mall Inmternational
Exhibition Center, Tehran

2026

Organized by

Iran's API and Pharmaceutical
Packaging Syndicate

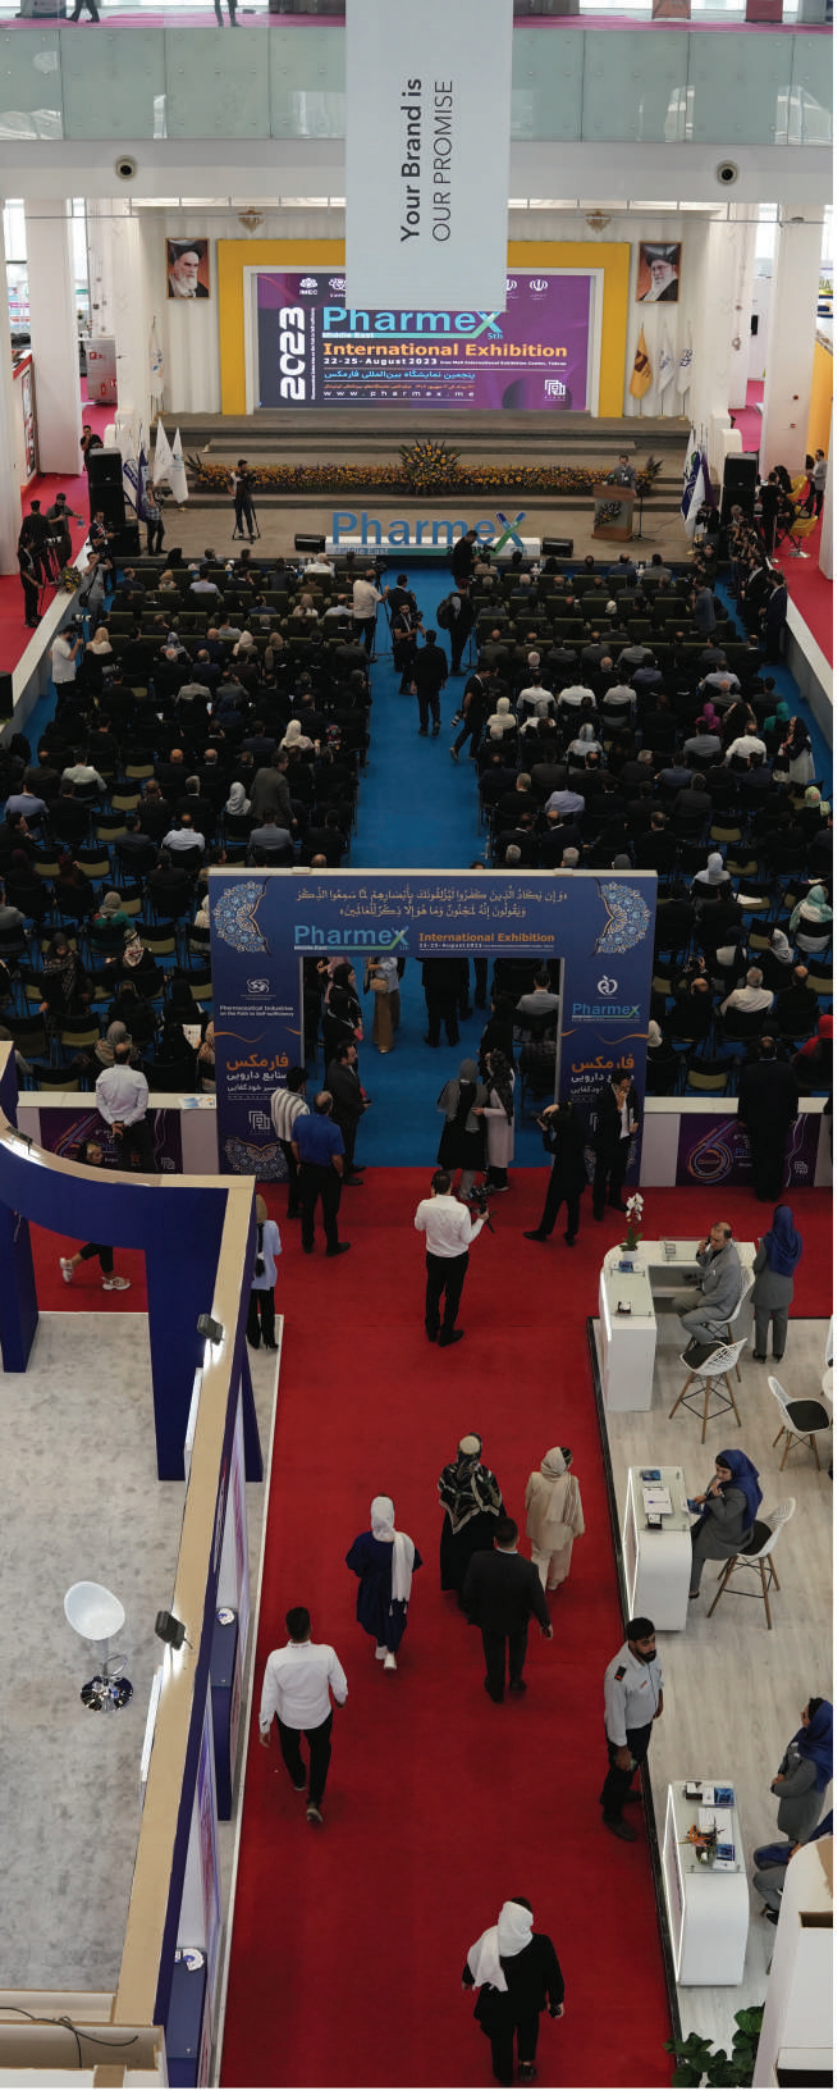

ABOUT THE EVENT

Pharmex is a great Pharma event which is trying to gather industry's key players from all around the world under one roof, in order to provide business opportunities for active players of the industry more than ever and also help the domestic companies to grow.

This international event is held annually by Iran's API & Iran's Food & Drug Administration and in its 9th year has drawn the attention of active companies and investors to itself.

Pharmex Middle East 2027 as the only official pharmaceutical event in nation's schedule will be held on 2027 . at Iran Mall Inmternational Exhibition Center. Tehran

ABOUT IRAN'S PHARMACEUTICAL INDUSTRY

As one of the fastest-growing pharma markets in the region even under the US sanctions, Iran's pharmaceutical industry can be the next

pharmaceutical leader in the Middle East. As a result of good policies taken by the government and Iranian syndicate, approximately %98 of the consumption is domestically produced and only %2 is being imported. High medicine consumption rates amongst Iranians have been recorded with every citizen using approximately 340 units on average per year. This makes Iran the second-largest consumer per capita in Asia and the 20th in the world. The average number of medicine per prescription of doctors internationally is 2 units, whereas in Iran it is at 3.5 units.

The Iranian pharmaceutical industry has a large domestic market and additionally has numerous opportunities for cooperation.

With having qualified factories, international experience in the production of medicines, good quality of the Finnish products, diverse product range, and a competent workforce, by 2027, the Iranian pharmaceutical market will be worth approximately $5 billion. Iranian companies are also growing rapidly in the export sector. They export pharmaceutical products to more than 30 countries and European countries.

The Future of Iran's Pharmaceutical Industry: The Strategic Role of Raw Materials and Packaging

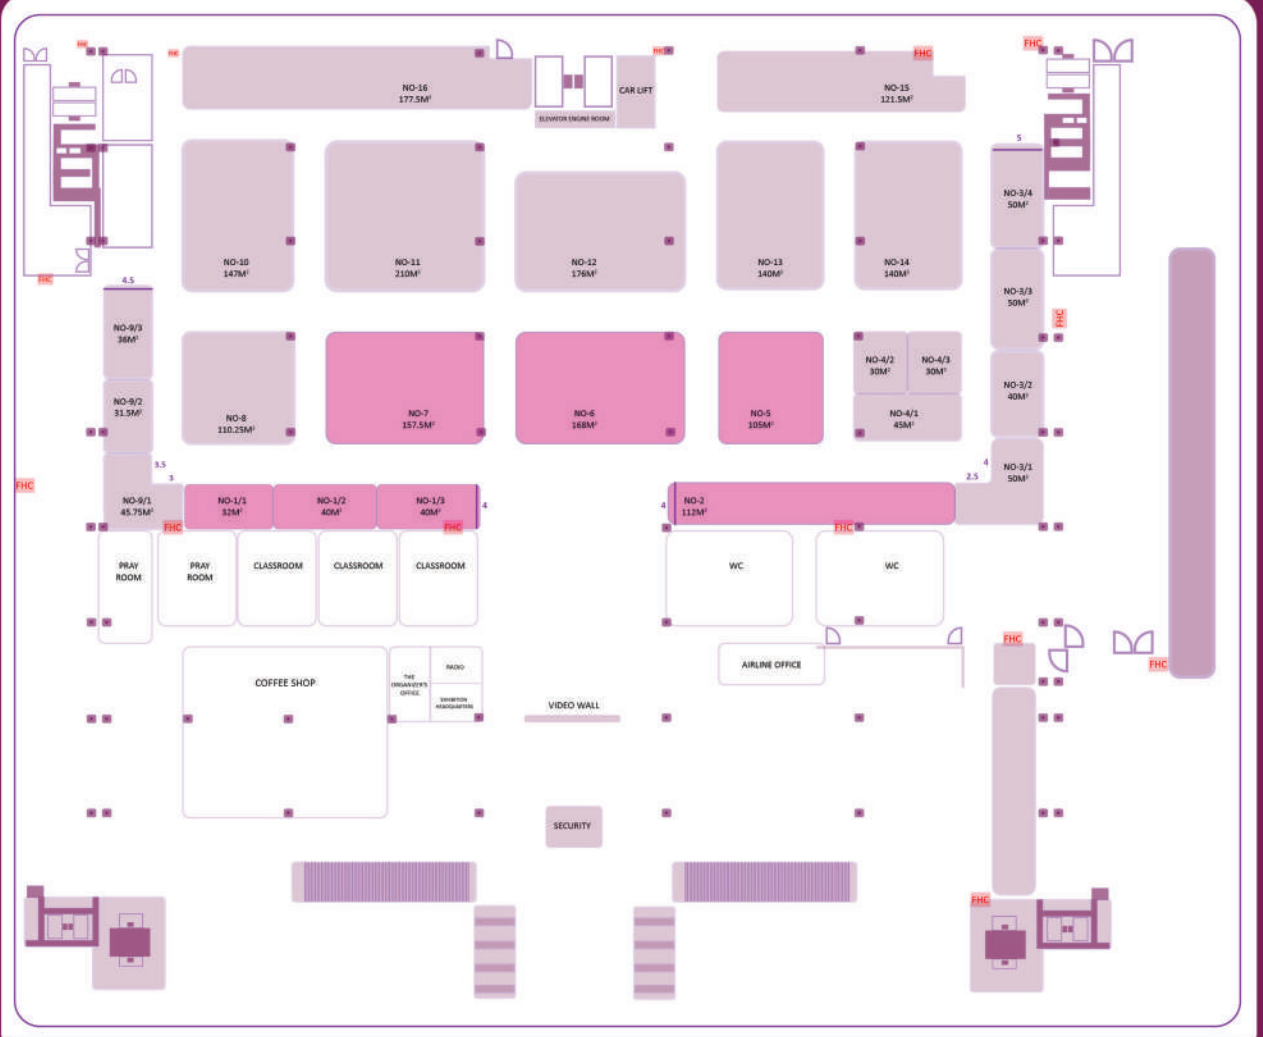

Iran's pharmaceutical future will depend not only on the growth of finished drug manufacturing but also on the development of its upstream industries, particularly pharmaceutical raw materials, active pharmaceutical ingredients (APIs), excipients and advanced packaging solutions. Domestic manufacturers of pharmaceutical ingredients and packaging materials have a strategic opportunity to strengthen supply-chain resilience, reduce import dependency and support the expansion of local drug production. However, the next phase of industry development will require greater investment in technology, quality assurance, international standards, specialized packaging, serialization and sustainable manufacturing practices. As global pharmaceutical supply chains become increasingly sophisticated, Iranian suppliers must move beyond meeting domestic demand and focus on international competitiveness, regulatory compliance and product innovation. In the coming years, the integration of pharmaceutical manufacturing with a technologically advanced raw-material and packaging ecosystem could become one of the key drivers of Iran's pharmaceutical exports and its broader participation in regional and international markets.

B2B MEETINGS PHARMEX MIDDLE EAST
AN INDUSTRIAL B2B EXHIBITION

B2B marketing is one of the most profitable marketing methods in trade world. This may seem less recognized by normal customers and users, but a large amount of trades are being done through this way.

One of the most advantages of B2B business is the large traded volume and this is true for a B2B exhibition as well. Because your customers in this exhibition are not only the finished product customer, but also have a business experience, they are also your services and other products customer and by attending this event you are able to gather a complete database from your customers.

ABOUT IRAN,S API CHEMICAL AND PHARMACEUTICAL PACKAGING SYNDICATE

Iranian API, Chemical and Pharmaceutical Packaging Syndicate was founded officially in 2001. The aim of this syndicate has been mainly to promote Iran's pharmaceutical industry by replacing generic drugs with branded name drugs.

Since the very beginning, this syndicate had a primary focus on every aspect of this industry in order to promote the domestic industry in the best way by supervising, sampling and analyzing the products and holding regular meetings with the members.

In their meetings, they discuss the tariffs on imported pharmaceutical products as well.

Importing the newest technologies and solutions for domestic manufacturers has been a high priority and now the members of this syndicate can provide more than **78%** APIs and the whole country's need in the pharmaceutical packaging sector under standards of GMP.

Iran's pharmaceutical market is likely to become a leader in the Middle East and Iran's API, Chemical and Pharmaceutical Packaging Syndicate has always been open to cooperating with international and foreign industry players around the globe in favorable conditions.

IMPORTANT PROGRAMME
PHARMEX MIDDLE EAST 2026

- Specialized meetings with economic and supporting institutions
- Presenting the latest Industrial and Scientific achievements
- Special Meeting Between Iran and Countries' trade boards
- Special workshops
- Pharmex Awards
- Publishing investment opportunities
- International Pavilion
- Pharmex Pulse

ABOUT THE ORGANIZER

ALAND MARKET

Aland is an organization which serve's different types of community to attract the right people and helps to create memorable experience for both suppliers and customers. Based on the knowledge and skills that we have at Aland we are able to successfully help your business and display your products and services to potential buyers and suppliers.

Actually, Aland connects people and creates opportunities for companies across five continents to develop new business, meet customers, launch new products, promote their brands and expand their markets.
